## **DETAILED ACTION**

### ***Response to Arguments***

1. The amendments and arguments presented by the applicant have been duly noted. However, an update search and further review of the prior art of record has prompted the presentation of new rejections presented below. In view of such, the previous rejections in the first office action have been withdrawn.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Mehta (U.S. Patent Number 5,528,229).

Mehta discloses for thermostatically controlling the operation of multiple speed fan. The automatic mode stored for fan unit 8 provides a program for changing the speed of fan unit 8 according to the temperature in the room. This program contains a suitable temperature for each speed. The speed then increases to the next faster fan speed when the measured room temperature rises above the temperature associated with the next faster fan speed. Also, the speed decreases to the next slower fan speed when the measured room temperature falls below the temperature associated with the operating fan speed (col.8, line 65- col.9, line14).

### ***Allowable Subject Matter***

4. Claim 5 is allowed.

Art Unit: 3744

5. Claims 2-4 and 7-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
